1. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.
2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

3. The disclosure is objected to because of the following informalities: page 3, the reference to a specific claim should be deleted.

Appropriate correction is required.

4. Claims 1, 2, 5, and 6 are objected to because of the following informalities: overly broad and/or relative terms including "plate-like" and "some distance" (claim 1), "large" (claim 2), "commercially available" (claim 5), and "standard" (claim 6) should be deleted as they impart no meaningful limitations to the claims. Appropriate correction is required.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 4, "the scissor lifting unit" lacks antecedent basis;
and claim 4, "the base frame linear guides" lacks antecedent basis.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3652

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyahara et al (previously of record) in view of Carder (US 3,341,042), Shaw (US 3,370,727), or Anderson et al (US 4,312,619).

As noted in the previous Office action, Miyahara shows the invention essentially as claimed but lacks a scissors unit. The Sikli reference was previously used to teach a scissor lifting unit but the claims have now been amended as to require a scissor unit which provides only guidance, while separate lifting cylinders provide the sole lifting force.

Carder, Shaw, and Anderson all show mobile lifting platforms wherein scissor units provide only a guiding function and separate lifting cylinders provide the sole lifting function.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified the apparatus of Miyahara with a scissor unit providing only a guiding function and lifting cylinders providing the sole lifting function, as shown by any of Carder, Shaw, or Anderson, to enable the lift to collapse to a minimal height while at the same time providing a guiding function.

9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miyahara in view of Carder, Shaw, or Anderson, as applied to claim 1 above, and further in view of Perkins et al (previously of record).

Miyahara as modified does not show a dual stage cylinder lifting system.

As noted in the previous Office action, Perkins shows such a system.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have further modified the apparatus of Miyahara with a dual cylinder lifting system to increase the lifting height of the system without requiring excessively long cylinders.

10. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Keenan whose telephone number is 571-272-6925.
